
Precision Curves Workshop

Student Supply List

Sue Heinz

This class focuses on sewing precision curves using a Drunkard's Path block. Don't be fooled into thinking this is the 'same old' technique you are used to. This amazing technique will allow you to produce four blocks at a time with the help of a template you will be provided. With the addition of Elmer's School Glue, you will experience piecing accuracy like never before - without relying on any pins, clips, or gadgets!

Please Bring:

- Two (or more) contrasting color fat quarters, well starched and ironed.
- Sewing machines and thread will be provided - Yay!
- Bring your iron (travel-sized please) and a small, firm ironing pad.
- One 4 oz. bottle of Elmer brand, WHITE, Washable School glue. Please do not bring any other brand or color!
- Rotary cutter and small mat.
- A 5" square ruler. (8" square rulers also work. Any larger format gets cumbersome).
- A thin chalk pencil (or contrasting fabric color, removable marking notion).
- One can of spray starch. Make sure it is starch, not sizing! Avoid brands sold at Dollar Tree stores.
- Note paper, pen, and a pencil.

Required Kit fee: \$7.00, collected in class, for one of Sue's Elmer Bottle and Tip Sets, unless you already own one. If so, PLEASE bring yours to class. No substitutions, please.
